Project Title	AI BlogNest API

1. Problem–Solution Fit

Problem	ContentGen Solution	Benefit
Draft management	Blog CRUD/lifecycle services	Structured content
Category/tag difficulty	Categorization and tag indices	Better discovery
Approval workload	Role-controlled workflow	Controlled publishing
Comment moderation	Protected endpoints	Safer interaction
Media handling	Media metadata/path support	Consistent references
Writing effort	AI generation	Faster drafting
Long content	AI summarization	Concise abstracts
Unauthorized access	JWT + RBAC	Protected resources

Fit Statement

ContentGen addresses the documented problems by combining content management, role-based security and Generative AI in one modular backend.

Value

Centralized workflow.
AI-assisted generation and summarization.
Validated MongoDB data.
Controlled access by role.
Security safeguards and logging.
